PROJECTS

● FOOD RECIPE FINDER

Programming Languages: HTML, CSS, JAVASCRIPT, REACT-JS

- Designed and implemented a web application using HTML, CSS, and React-JS to create a recipe finder website.
- Implemented information retrieval techniques to allow users to search for recipes based on various criteria.
- The application provides a clean and user friendly interface to the users for easily use and to get the recipe they want in no time

● JUSCTIC LEAGUE THEME WEBSITE DESIGN

Made with: Figma

- Created an engaging and interactive theme page for the Justice League using Figma, highlighting each iconic character with a captivating design and subtle animations.
- This project seamlessly weaves together the origins, abilities, and key characteristics of every justice league character.
- The smooth transitions between characters add an element of surprise and delight.

● WEATHER APP DEISGN

Made with: Figma

- Meticulously designed a modern and user-friendly weather app interface using Figma showcasing expertise in creating an intuitive, informative, and visually appealing platform for keeping users updated on current and forecasted weather conditions.
